AMENDMENTS TO THE CLAIMS

This listing of claims replaces all prior versions of claims in the application.

Listing of Claims

Claims 1-39 (cancelled)

Claim 40 (currently amended): A centrifugal fan motor for cooling a device, ~~the fan~~ ~~motor~~ comprising: a motor component having a rotary section, a stationary section and a bearing supporting the rotary section rotatably against the stationary section for rotation about a rotational axis; and an impeller connected to the rotary section, wherein said impeller includes:

a rotational force transmission portion provided on an [[the]] impeller lower end, for receiving driving force from the motor component;

a lower endwall portion fixed correspondingly to said rotational force transmission portion, for structuring a wall; and

an impeller blade unit having plural blades, each of the blades at its lower end being fixed outer-marginally to the upper surface of the lower endwall portion and each of the blades extending axially to its upper end, the blades together defining an opening at an [[the]] impeller upper end, and rotation of said impeller blade unit therein generating an airflow streaming along the rotational axis through the opening and ~~towards outside~~ outward in a radial direction perpendicular to the rotational axis, said impeller blade unit being dimensioned such that given
